SHAMINI
GROUP OF COMPANIES

THE PART
BEHIND THE RIDE
YOUR SPEC. OUR CRAFT.

PRODUCT CATALOGUE

ISO 9001:2015

Manufacturing high-quality components
for motorcycles and three-wheelers.

OUR PRODUCT RANGE

Shamini Group develops product designs and manufactures rubber, plastic, soft PVC and metal components. Our capabilities connect design and tooling with fabrication, surface finishing, final assembly and packing.

This catalogue presents the product families shown in our supplied portfolio, alongside our manufacturing services. Existing product availability, vehicle fitment, dimensions and materials are confirmed for each enquiry.

PAGES	PRODUCT OR CAPABILITY
03	Design and development
04–07	Metal components and vehicle-related product groups
08–12	Rubber parts, profiles, accessories and vehicle mats
13–14	Plastic parts and other accessories
15	Soft PVC and plastic extrusion
16–17	Surface finishing and final assembly
18	Flooring and general-use mats
19	Custom components across industries
20	Manufacturing equipment overview
21–22	Product enquiries and contact details

HOW TO USE THIS CATALOGUE

Send the product name or a marked photograph with your enquiry. Include a drawing or existing part reference for custom components. Pictured products illustrate the portfolio; they do not confirm stock availability or fitment for an unspecified model.

CT 100 Application Components

Selected motorcycle components and associated accessories shown for the CT 100 reference.

Sari guard; leg guard

Engine hanger bracket LH and RH

Upper cowling bracket

Lower fork bracket; signal bracket

Front and rear number plates or holders

Front engine mounting bracket

Centre stand

Pillion step holder assemblies LH and RH

Rider step holder assembly

Side stand

Handlebar; cable guide

Chain case rubber cap

Tool bag

Tool wrench 13 × 17; boxspanner 16 × 14

Tool bar; screwdriver

Brake pedal assembly

Discover 125 Application Components

Metal and rubber components illustrated for the Discover 125 reference.

Pillion steps LH and RH

Brake pedal assembly

Strut housing plate assemblies LH and RH

Footrests LH and RH

Rear number plate bracket

Side stand; main stand

Sari guard

Handle Bar

Centre stand rubber knob

Door damper

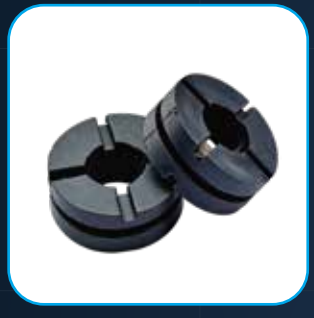

Brake pedal rubber cap and rubber pad

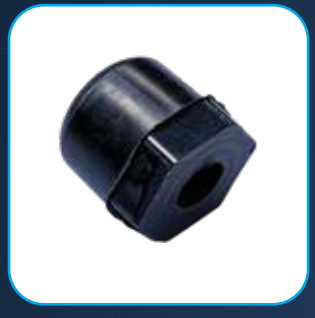

Bracket assembly insulator

Floor board plug: insulator

Rubber H washer

Kick-stopper rubber with hexagon nut

Battery holder bracket

Senaro GN 125 Application Components

Metal and rubber components illustrated for the Senaro GN 125 reference.

Assembly Front foot Rest LH/R

Handle Grip LH/RH

Number Plate Cover plastic

Assembly Rear Foot Rest LH/RH

CSC TURNING & MILLING PARTS - THIMARK

Metal and rubber components illustrated for the CSC Turing & Miling Parts for Thimark reference.

Projection Bush 01

Projection Bush 02

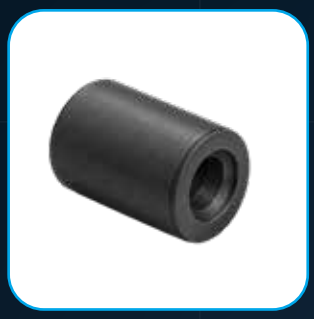

Projection Bush 03

Projection Bush 04

Bush A

Bush B

Bush CS

Projection Pin

Handle Bar Bush

CSC TURNING & MILLING PARTS - CT100, DISCOVER 125

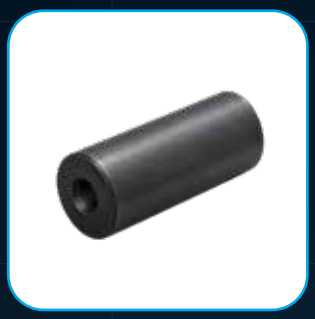

Metal and rubber components illustrated for the CSC Turing & Miling Parts for CT100, DICOVER 125 reference.

Step Rider Pin

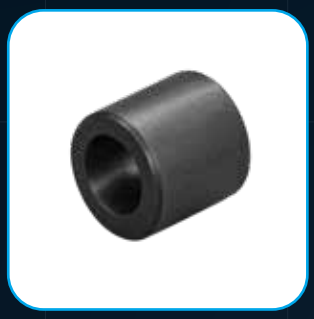

Upper Cowling Speser

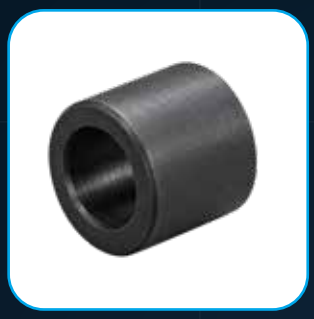

Solid Inset

Hex Bush Nut

Bush 01

Sleeve Secondary Link Derlin

Sleeve Derlin

Rivert Flat

Sleeve Bracket Box

Pin

Kick Stopper Pin

Raider 125 and NTORQ 125 Components

Selected scooter and motorcycle components from the supplied product portfolio.

Fender brace; rear fender bracket

Crash guard; crash guard mounting part

Prop stand assembly and associated bracket

Front engine mounting bracket

Headlamp housing bracketbracket

Pillion footrest assemblies LH and RH

Footrest connector

Centre stand assembly

Sari guard

Front and rear number plate parts

Tool kit

Rubber Boots and Cable Protection

Protective rubber components illustrated in several shapes and sizes. Material, openings and dimensions are application-specific.

Axle boot large

Axle boot small

Axle boot large without nozzle

Axle boots with other illustrated profiles

Fork boot

Accelerator cable boot

Brake cable boot

Clutch cable boot

Clutch lever boot

Brake lever boot

Cable boots

Mountings Bushes Dampers and Small Rubber Parts

Rubber parts for defined fitment, contact and protective functions. No universal load, temperature or service-life rating is implied.

Engine mount rubber

Front shock lower rubber bush

Front shock top bush

Rear shock lower rubber bush

Rear shock top rubber bush

Kick bush; kick-stop rubber

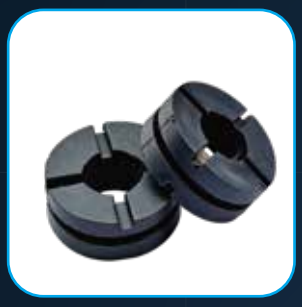

Coupling rubber or flange rubber

Door damper; insulator

Bracket assembly insulator

Rubber H washer

Floorboard plug

Centre stand rubber knob

Safety knob; rear door rubber knob

Dust cover

Brake pedal rubber

Footrest rubber

Rubber Beading and Profiles

Beading and profile products for suitable vehicle and other applications. Cross-section, length and material are confirmed for each item.

Windscreen beading

Rear glass beading

Joint beading

Horn guard beading

Side mudguard beading

Tail light glass beading

Headlamp cowling beading

Cabby beading

Beading rolls

Outer casing

Rubber Accessories and Contact Parts

Additional rubber parts and vehicle accessories shown in the supplied range.

Rubber mud flap

Printed rubber mud flap

Printed rubber mud flap SMS

RE SP mud flap

Embossed mud flaps

Handle grip

Starter handle clip

Rear door rubber knob

Brake pedal rubber OM

Brake pedal rubber FL

Coil spring rubber

Bumper rubber

Petrol cock lever rubber

Safety bar cover set

Moulded Plastic products

Additional rubber parts and vehicle accessories shown in the supplied range.

Safety door

Handlebar top cover

Wiper motor cover

Plastic mud flap bracket

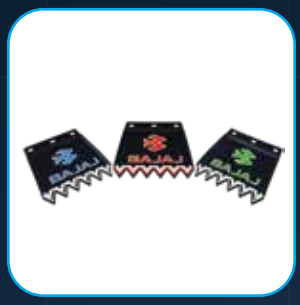

Number plate brackets and holders

Bottle holder

Plastic auto mirror arm

Embossed mud flaps

Hybrid wheel cap cover

Cover joint plate

Hood frame bracket

Plastic Trim Handles and Related Accessories

Additional moulded parts and accessories from the supplied portfolio.

Auto mirror set

Grab handle

RE SP rear mud flap

Petrol tank cap 4S

Petrol tank cap 2S

Rear door knob

Upper dashboard trim LH and RH

Joint beading OM plastic

Three Wheeler Metal Components

Metal parts and supporting hardware illustrated for three-wheeler applications.

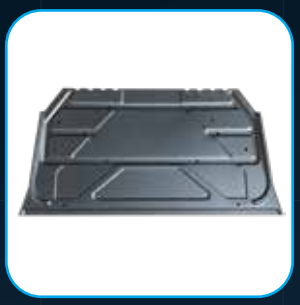

Steel auto mirror arm

Steel mud flap bracket

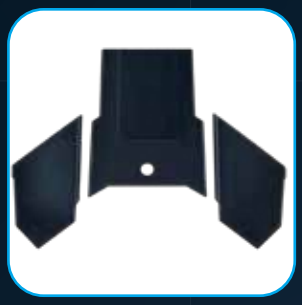

Stainless steel hood bar

Steel floorboard

Mount rubber cup; Wheel spacers

Steel Y bar

Number plate brackets

Vehicle Carpets and Mats

Vehicle-specific carpets and protective matting from the supplied portfolio.

Scooter carpet Activa

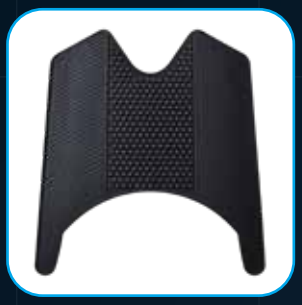

Scooter carpet Wego

Scooter carpet Dash

Scooter carpet Dio

Scooter carpet Pleasure

Front rubber carpet NT

Front floor carpet 4S

Front floor carpet 2S

Rear floor carpet NT or 4S

Rear floor carpet 2S

Luggage mat NT

Battery mat

Four Wheeler Side Step components

The current company profile illustrates a complete side-step kit for the ALMAZ SUV application. The kit brings together several materials in one accessory.

Metal brackets

Rubber beading

Powder-coated aluminium frame

Plastic strips

Plastic end caps

Weather Protection and Other Accessories

Associated vehicle accessories included in the supplied portfolio. Material classification is confirmed per item.

Sun visor

Door visor

Side curtain

Air cover

Handlebar pocket cover

Flooring and Interlocking Matting

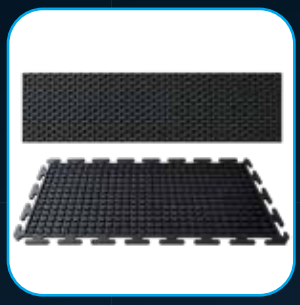

Flooring and matting products for defined commercial, transport and recreational requirements.

Interlocking flow-through mats

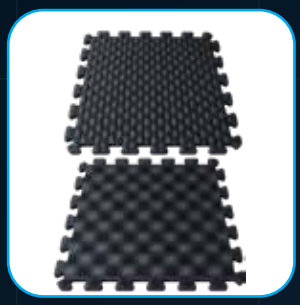

Covered flow-through carpets

Industrial carpets or mats

Heavy-duty mats

Gym mats or gym carpets

Interlocking floor carpets

Table Mats Walking Mats and Slippers

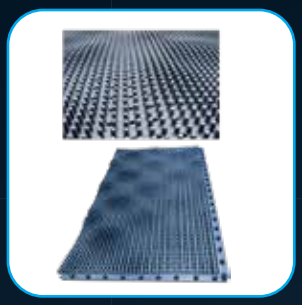

Consumer and commercial products extending Shamini's rubber product background beyond vehicle components.

Table mats

Walking mats

Foot spa walking mat product

Bath slippers

NEW COMPONENTS MADE TO AGREED REQUIREMENTS

The existing range is the starting point for a broader manufacturing discussion. Buyers from other industries can submit component requirements for technical review against Shamini's rubber, plastic and metal capabilities.

RUBBER

Moulded bushes, mountings, grommets, seals, protective components and other suitable rubber parts. Tooling, compound, dimensions and acceptance criteria are defined for the project.

PLASTIC AND SOFT PVC

Moulded covers, housings, guards and suitable extruded profiles. Geometry, polymer grade, tool design requirements, finish and quantity determine the production route.

METAL

Brackets, mountings, machined parts and fabricated components. Drawing, material, thickness, joining, finish and inspection requirements are reviewed before acceptance.

A defined manufacturing scope

New sectors, new materials and new performance requirements may need additional testing, tooling, qualifications or external processes. Feasibility is confirmed before quotation and production commitment.

Your specification defines the opportunity. See the companion industry scope for application areas suitable for discussion.

MATERIALS AND MANUFACTURING PROCESSES

Material family	Materials identified in company sources
Rubber	Natural rubber, EPDM, NBR, neoprene, butyl rubber and silicone
Plastic and soft PVC	Soft PVC, TPE, TPU, polypropylene and ABS
Metal	Mild steel and stainless steel; the four-wheeler kit also shows a powder-coated aluminium frame

PRODUCTION PROCESSES

Process family	Capabilities described
Moulding and extrusion	Rubber compression moulding; plastic injection moulding; soft PVC extrusion
Cutting and machining	Sheet and tube laser cutting; CNC turning; CNC milling
Forming	Pipe bending; power pressing; hydraulic pressing
Joining	Robotic welding; MIG; TIG; spot welding
Surface treatment	Metal pre-treatment and powder coating

Materials and processes are selected for the individual part. Availability, tool capacity and process limits are confirmed during technical review. The source abbreviation CP is not expanded here because the exact material description has not been verified.
